Language Arts

Dr. Brumm

In ELA we have just finished up learning about personal narratives through Freak the Mighty. The projects that were turned in are wonderful. The kids have also worked through many skills including nouns, fact and opinion, fiction and nonfiction and understanding the author's point of view. Next we will begin writing our own personal narratives. Please begin brainstorming!!!

Math

Mrs. Murray

During 1st quarter we spent Mondays taking a Stanford course about how to learn math. It combined important information on the brain and learning with new evidence on the best ways to approach and learn math effectively. It also taught them about their own potential to succeed and the strategies needed to create a growth mindset.

Your children worked together to make classroom agreements (see pics) that have created a positive environment where we are encouraged to make mistakes because "mistakes help us grow."

Science

Mr. Frigillana

We have done a lot in science class over the last 9 weeks. We have studied everything from density, mass, and volume to the structure of atoms, and even learned the science behind how and why popcorn 'pops.' We also did a lot of work analyzing the Periodic Table of Elements as well.

Social Studies

Mr. Frigillana

In social studies we learned the 50 states and their capitals, the essential elements of maps, and studied time zones and landforms. Most importantly we met "Mr. Help" who helped us learn the 5 Themes of Geography and who will guide us throughout the rest of the year.
